### Objectives and topics

The ISSC 2019 Special Session offers an opportunity to gather research scientific works related smart cities, advanced technologies in the context of economic aspects.

Special Section focuses on the use of advanced technologies in smart cities where we are searching for papers focused on basic and applied topics. Advanced technologies and economical aspects and models have been chosen deliberately as fields in which international excellence has been being achieved over a long period of time.

The goal of this special session is to bring together researchers from different fields of expertise, lead to a better understanding between them, and to promote interaction in this interdisciplinary area. All in all, we want to create an opportunity for the participants to exchange about a wide range of topics related to the area of advanced technologies and economics.

The scope of the ISSC 2019 includes, but is not limited to the following topics:

- Economical evaluation of solutions of smart cities and Industry 4.0 challenges and opportunities in Smart City/Smart Region development
- Feasibility studies of solutions of smart cities
- E-commerce in the context of Smart Cities
- E-government and virtual versus personal identity
- Smart city as a solution of demographical degradation of European Union/elderly population in the world
- New trends of education as a key factor for smart cities concept
- Strategies and procedures applicable in modelling and simulations
- Technological solutions for sustainable development under the smart cities concept
- Technological context of renewable and non-renewable energy sources
- Smart City Logistics, decision dynamics models, support mapping software
- Sustainability and trends and challenges in smart cities

Any other topics strongly related to intelligent profitable solutions and smart cities are also welcome. Please contact directly session chairs to confirm a suitability of your paper topic.

## Submission

All contributions should be original and not published elsewhere or intended to be published during the review period. Authors are invited to submit their papers electronically in pdf format, through EasyChair. All the special sessions are centralized as tracks in the same conference management system as the regular papers. Therefore, to submit a paper please activate the following link and select the track: **ISSC 2019: Special Session on Intelligent Sustainable Smart Cities**.

<https://easychair.org/conferences/?conf=iccci2019>

Authors are invited to submit original previously unpublished research papers written in English, of up to 12 pages, strictly following the LNCS/LNAI format guidelines. Authors can download the Latex (recommended) or Word templates available at [Springer's web site](#). Submissions not following the format guidelines will be rejected without review. To ensure high quality, all papers will be thoroughly reviewed by the **ISSC 2019 Program Committee**. All accepted papers must be presented by one of the authors who must register for the conference and pay the fee. The conference proceedings will be published by Springer in the prestigious series LNCS/LNAI (indexed by ISI CPCI-S, included in ISI Web of Science, EI, ACM Digital Library, dblp, Google Scholar, Scopus, etc.).
